

# RCII – Country Profile

Select the **Country Profile** tile on the main page, or the **Country Profile** tab on the menu bar, to delve deeper into your country of focus. You can switch between countries of interest using the country drop down tab. Users can also drill into country profiles using the arrows next to the four main dimensions. Any variable clicked on will have its definition pop up on right.

The **Cluster Table** feature offers an additional option for viewing **rankings** of a country with respect to a chosen variable. Up to four clusters will be displayed for any chosen country, including world, development cluster, region, and IGO cluster. **NOTE:** Countries may have additional clusters that are not displayed in this table but are in the settings tab.

# RCII - Charts

The **Country Profile** tile/tab includes the RCII's charting functionality below the country drill down. The charting functionality is also available under the **Charting** tile/tab. Note, the charting functionality at the bottom of Country Profile defaults to the country in focus to provide an easier start. Charting allows users to visualize data in a variety of ways as they undertake their clinical diagnostics (see the Charting Tutorial).
